VESTA'S DRAADLOZE ROOKGENERATOR

We presenteren de Nebula VESTA **beveiligingsrookgenerator** voor het **VESTA alarmsysteem**, dat tot op heden **de beste manier is om diefstal te voorkomen**, omdat het is ontworpen om de omgeving te verzadigen met een rookgordijn en **daardoor te voorkomen dat iemand in de desbetreffende omgeving kan werken**.

De belangrijkste kenmerken zijn het **kleine formaat**, de lage **installatiekosten**, het **gebruiksgemak**, de combinatie met het VESTA paneel en de mogelijkheid van **activering via een meldkamer** om de effectiviteit ervan aanzienlijk te vergroten.

- **Module via draadloos** signaal en in/uitgang van geïntegreerde relais
- Integratie van sirene **met tamper**
- Standaard incl. **een volledige rookpatroon**
- Verzadigingscapaciteit van **150 m³ in 30 seconden**
- Activering volgens **toegewezen regels**
- Magnetische **sprong** + PIR, magnetische + 2 PIR, enz.

- **Werkt op batterijen**, met een levensduur tot 4 jaar
- De gegenereerde rook is **gecertificeerd als niet-toxisch** en bij elk schot moet de interne patroon worden vervangen
- Activering door geverifieerd alarm en mogelijkheid tot **activering vanuit Meldkamer of SmartHomeSec App**
- Beschikbaarheid van (na) **vulpatronen met minder capaciteit** voor een demo

INTEGRATIE MET OPTEX

Volledige controle van OPTEX-sensoren

VESTA en OPTEX zijn reeds geïntegreerd met de **VESTA-271 draadloze zender**. De TX-interface van VESTA **integreert naadloos** met de OPTEX **buitensensoren** van de **BXS, VXS, WXI, WXS** en **QXI** serie, waardoor **volledig beheer op afstand** vanaf elk VESTA centrales mogelijk is.

- **Betrouwbare en nauwkeurige inbraakdetectie**, met alle voordelen van OPTEX en VESTA technologie
- **Volledige sensorconfiguratie op afstand** via de **SmartHomeSec App/Web**
- **Configureerbare parameters**: gevoeligheid, batterijbesparing, antimasking, onafhankelijk alarm en LED aan/uit schakelaar
- **Alarmmeldingen**, tamper, lage batterij, en monitor meldingen
- **Zeer eenvoudige installatie** zonder bedrading

INTEGRATIE MET VIDEO ANALYSE

VESTA maakt het mogelijk om eenvoudig **tot zes IP camera's** (DAHUA, HIKVISION, HYUNDAI of EZVIZ) aan het systeem toe te voegen. Integratie met **EZVIZ** stelt ons in staat om live te kijken. Met **DAHUA, HIKVISION, HYUNDAI** en **VESTA** camera's kunnen we live **kijken** en een **reeks foto's maken** van een of meerdere zones van het systeem in geval van alarm. Ook stellen de **DAHUA Series 3** camera's (2019 firmware of hoger) ons in staat om **het alarm te activeren door de analyses** (AI) die door de camera zelf worden gegenereerd.
